Abstract (en)
[origin: EP1382287A2] The device has a water conducting arrangement (9) and at least one spray head (10) with at least one spray opening (12a,13a,13b) on the conducting arrangement and rotatable about an axis (14) by water pressure. The spray head is acted upon by a mounting arm (16,17) on the tank side and is held against the water conducting arrangement, whereby by rotating the spray head the spray opening is periodically at least partly covered by the holding arm. An Independent claim is also included for the following: (a) an automatic dishwasher with at least one inventive spraying device.
