Abstract (en)

[origin: EP1382536A1] The applicator unit (1), to blend together ingredients for the preparation of a cosmetic products, has at least one chamber (9,12) to hold the ingredients e.g. as a liquid and a powder. A body (20), at least partially with elastic compression, is within a passage formed by the structure. The walls (2,3) of the lower container can be squeezed by hand to develop an internal pressure to force the fluid into the passage and displace the elastic body to pass into the second container, and be delivered out of the unit through the applicator (10).
