Abstract (en)
[origin: EP1382766A2] A kit for building composable lattice structures comprises a plurality of lattice girders (2) each of them extending along a respective longitudinal axis (X); a plurality of junction elements (10) to be engaged each with one end (2a) of a girder (2); a plurality of hooking devices (11) each associable with at least one junction element (10); each of the junction elements (10) having a box-shaped structure (12) defined by a plurality of side walls (12a, 12b, 12c, 12d), to surround the end (2a) of the respective girder (2). <IMAGE>
