Abstract (en)
[origin: WO0165027A1] The invention relates to sealing or insulating sheeting made of (polymer-)bitumen, especially for covering roofs and lining external cellar walls, comprising at least one self-adhesive surface which is made of an adhesive material and which is provided at least over a portion of the surfaces of the sheeting. The or each self-adhesive surface is provided with a protective covering that can be peeled off. The inventive sheeting is characterized in that the protective covering (3) of at least one self-adhesive surface (2) is slit and/or perforated at one or more locations (4) and/or is provided in the form of several partially overlapping separation layer sheetings (3, 3', 3'', 3'''), whereby portions of the protective covering (3) can be peeled off separately from one another along predefined lines.
