Abstract (en)

[origin: EP1382778A1] The metal fence. consisting of posts with folded edges (1, 1', 2, 2') and mesh panels (7) with horizontal (12) and vertical wires, has the ends of the horizontal wires flattened or bent so they are held in slots (11) in the post folds when inserted through enlarged ends (10) and then pulled into the tapering portions of the folds. After fitting the mesh panels, the open upper ends of the posts are closed by caps with spring clips that also engage with the slots.
