Abstract (en)

[origin: EP1382822A2] The method involves adapting different types of fuel-air mixture deviation by estimating the influence of a first type of mixture deviation on a previously conducted mixture deviation of a second type during or after adaptation of the first type of mixture deviation and correcting the adaptation of the second type of deviation depending on the estimate. An Independent claim is also included for the following: (a) an electronic controller for implementing the inventive method.
