Abstract (en)
[origin: US2004168355A1] The invention relates to an absorbent and desorbent device, characterised in essentially comprising at least one micro-porous membrane (1) with absorbent and desorbent properties, by means of at least one porous permeable cover (2) and at least one impermeable cushioning sub-layer (3). The invention is particularly applicable in the field of absorbent materials, most particularly when used for items of clothing or domestic products.
