Abstract (en)

[origin: US2004206783A1] Disclosed is a dispenser (1) for a cream-type material or material which can be deposited by applying it to a surface, comprising a chamber (5) with a discharge opening (10) for receiving and storing said material, a spindle which is rotationally and longitudinally-axially arranged in the chamber (5), a piston (18) which can move inside said chamber (5) along the spindle (16) by rotation thereof (18), and an actuating element (4) for the spindle, which is rotationally fixed to said spindle (16), said spindle (16) being provided with a least two regions (16a, 16b) having various thread pitches along the length thereof.
