Abstract (en)

[origin: WO02085314A1] Cosmetic and perfume products with amber contain modified amber in the quantity 0.001 % - 100 % by weight. In order to be used for cosmetics production, amber is primarily exposed to the action of physical or chemical agents or mechanical energy. An additional cosmetic effect is achieved by adding energizing or active substances as sea alga, yeast extracts, enzymes, liposomes, vitamins and others to modified amber.
