Abstract (en)

[origin: WO02078691A1] The present invention provides methods for treatment of hot flashes in a mammal by administering duloxetine to that mammal. Another aspect of the invention is a method for treatment of hot flashes in a human female undergoing raloxifene administration by administration of duloxetine to that female. Another aspect of the invention is a method of treating hot flashes in a human undergoing estrogen replacement therapy comprising administering an effective amount of duloxetine.
