Abstract (en)
[origin: WO02062432A2] The invention relates to a snowboard binding interface which provides a solution in terms of comfort and safety and which can be fixed as an intermediate plate under every existing binding (except boots) on every type of ski, skwal or snowboard. Said interface comprises the ultimate features in comfort and safety and can also be used as a torque-measuring appliance for the maximum release torque which can be isometrically generated in the talocrural joint of the sportsman. Said interface also comprises a stop device which can be operated in various angular positions.
