Abstract (en)

[origin: WO02091063A1] The invention relates to a mount for two frameless spectacle lenses (2), which is provided with a nose support between the spectacles lenses (2) and bearing parts (4) provided in the area of the nose support (4), on which the spectacle lenses (2) are glued. In order to provide good adhesive conditions, the bearing parts (4) have soft, flexible supports (3) made of plastic material to which the spectacle lenses (2) are glued along a peripheral area on the front face.
