Abstract (en)

[origin: EP1384431A2] A rack (12) of a dishwasher (20) is described comprising at least one side wall (11) and at least one shelf (3) connected with said at least one side wall (11) and arranged in at least one working position in such a way as to form with the bottom plane (40) of said rack (12) at least one first angle (A, B) smaller than a right angle. The rack (12) comprises at least a cutlery holder support (1) comprising holes (2) for the housing of cutlery and wide areas (30) for the flow of the washing water and/or the flow of drying air. The cutlery holder support (1) is located in proximity of said shelf (3) and it is revolvingly connected with at least one side wall (11) of the rack (12). The cutlery holder in working position forms with the bottom plane (40) of the rack (12) a second angle (C) different from the at least one first angle (A, B) and smaller than a right angle.
