Abstract (en)

[origin: EP1384679A1] A precut blank (1), a pack and a packaging method for containers (30) disposed in rows side by side and having a radially protruding stopper or upper edge (32) are described. The precut blank comprises a central panel (2) having apertures (5) to receive the neck of the containers, a pair of side panels (10, 11) connected to the central panel (2) by means of respective fold lines (3, 4), a cover panel (14) connected to the side panel (11) by means of a fold line (12), a top inside panel (15) connected to the side panel (10) by means of a fold line (13) and destined to receive a layer of glue for fixing to the cover panel (14), and an intermediate panel (17) connected to the upper inside panel (15) by means of portions of fold line (16) and destined to be disposed between two side-by-side rows of containers, so as to act as an intermediate rib and to ensure greater stiffness of the pack <IMAGE>
