Abstract (en)

[origin: EP1384802A2] To create a pattern, three colours (3.1,3.2,3.3) can be deployed in the yarn system. The carrier layer and the yarn system are initially needed from the carrier side and subsequently from the opposite side. The yarn system is initially combined with a staple fibre pile (2) to form a nonwoven. The nonwoven is fed to a carrier layer by a nonwoven side facing away from the yarn system. An Independent claim is made for the textile structure manufactured by using the process.
