Abstract (en)
[origin: EP1384836A2] The mounting stand comprises a minimum of three legs (1,2,3) connected to a single central mount (4) in such a way that at least two of them (1,3) are articulated to said mount (4) so as to adopt a spatial disposition in which the mount (4) is supported by the ends of said legs (1,2,3), the body of the mount (4) being attachable to the upright of the prop (12) by means of a sliding wedge device (15) capable of applying pressure to the external surface of the upright of the prop (12), the body of the device being attached to the legs thereof in its service position.
