Abstract (en)

[origin: EP1385183A1] The arrangement has a contact lever (7) and at least one flexible conductor (9) rigidly joined to the lever by applying heat and a pocket (16) on one end of the lever for accommodating an end section (17) of the conductor with a pocket floor (21) and three side walls (22-24) approximately perpendicular to the floor. The floor of the pocket has an approximately trapezoidal expanded shape and the end section shape matches the floor.
