Abstract (en)

[origin: EP1385286A2] The data acquisition units (1,1') have an event detector and a data transmitter communicating with a GSM system (2). Within this are base stations (20) coupled over an intranet (22) to a GPRS computer (27). Data packets are transmitted to the global Internet (30) that connection with a central facility (40) that evaluates the data.
