Abstract (en)  
[origin: DE10119902C1] The invention relates to a shelf system (1) comprising at least one support (2), which is arranged in a vertical manner, and at least one base (4) which is securely positioned on a fixable carrier (3) which is guided on the support (2). The aim of the invention is to provide a shelf system (1) with a reduced number of individual pieces which are compact, universally applicable, stable and optically pleasing, whereby said individual parts which are also easy to assemble can be adjusted to form said shelf system (1). The base carrier (3) comprises at least one enveloping element (5) and a single-piece support arm (6), said enveloping element (5) surrounding the support (2) in a complementary manner. The base carrier (3) can be clamped onto the support (2). Said base carrier (3) is arranged on the support (2) and can be continuously adjusted.
