Abstract (en)
[origin: WO02087515A2] The invention relates to agents used for colouring keratin fibres, which contain, in addition to dyes and/or intermediate dye products, an active ingredient combination comprising (A) at least one silicon oil and/or one silicon gum and (B) at least one polymer, containing at least one monomer unit of formula (I), wherein n represents a whole number between 1 and 3 and Y represents a physiologically acceptable anion. The inventive agent is characterised in that it improves the hold, wet compatibility and shine of the treated fibres, especially in Asian hair.
