Abstract (en)

[origin: WO02090644A2] The present invention relates to a fabric comprising at least two layers and/or two directions of individual elements of which at least one individual element is a reinforced element comprising a metal component, preferably a steel component, which elements are not interwoven but have only an indirect connection created by chemicals, plastics, rubbers or by a connection elements which are weaker than the reinforced element. The invention further relates to the use of said fabric as an anti-vandalism and/or cutting resistant fabric.
