Abstract (en)

[origin: WO03090105A1] A method for reporting the context of an alert condition is disclosed which includes reporting an alert condition associated with a subject system object (315) , and analyzing one or more system objects associated with the alert condition to obtain context data (325). The method further includes generating a context message based on the context data (330), and outputting the context message (335).
