Abstract (en)
The present invention refers to an adjustable picture hook composed of two plates (1,2) matched together with the possibility of horizontal sliding, with one plate (1) provided with means (1a) for fixing to the picture and the other plate (2) provided with holes (2a) or slots for fixing to support means on the wall. <??>According to the different constructive embodiments, the hook can be adjusted by acting on the sliding plates directly or with the aid of suitable adjustment means that determine the mutual sliding of the plates. <IMAGE>
