Abstract (en)  
[origin: EP1386576A2] Cleaning device (1) with steel wool (8) comprises a holding part (2) containing no steel wool, and a cleaning part (3) containing steel wool and connected to the holding part. An independent claim is also included for the production of the above cleaning device. Preferred Features: The holding part is fixed, especially glued, to the cleaning part, or is removably connected, especially by a Velcro fastener, to the cleaning part so that the cleaning part can be replaced. The holding part is rigid and is made of hard plastic or wood. The cleaning part is water-permeable and consists of a fiber material, especially a fleece (4), a fabric material, especially a textile material or mineral fibers, and steel wool.
