Abstract (en)

A ceramic tile forming mould comprises a bench protector plate (2), a block (3) associated with said bench protector plate (2) by raising means (11), at least one pad (6) securely fixed to said block, and a series of cylinder-piston units (22) supporting a vertically movable die plate (4), in which a pad linkage plate (5) is present, fixed to the block (3) by locking means operable from the outside and on which the pads (6) are securely fixed, and a manipulator bar (8) arranged to connect said die plate and said pads together to maintain them coherent and centered during the mounting and demounting of the remaining parts of the mould. <IMAGE>
