Abstract (en)

[origin: EP1386871A1] The conveyor system (1) for the processing of printed products (2) has a guiding system (3) along which conveyor elements (4) are moved. The guiding system is three dimensionally curved, and the conveyor system has holding devices which serve for the temporary fixing of the printed products in such a way that they are conveyed at least in sections against gravity force. The guiding system has one section (6) designed in helical form. The feeders (16) are located next to one another in the region of the helical line form section. An independent claim is included for a procedure for the processing of printed products using the aforesaid conveying system.
