Abstract (en)

[origin: EP1387029A1] A handle (1) for doors or windows comprises: a handle body (2) attachable to a door or window sash (A); an operating handgrip (4) protruding from one side of the handle body (2); drive elements (5) protruding from the opposite side of the handle body (2) and being connectable to operating devices (6, 7) for opening and closing the door or window; the drive elements (5) comprising a slider element (10) connected to kinematic means (8) and constituting the element that drives the operating devices (6, 7), and means (11) for locking the single slider element (10) in the different positions corresponding to the tilt opened and turn opened configurations of the sash; the locking means (11) being mounted on the slider element (10) detachably, that is to say, in such a way that they can be separated. <IMAGE>
