Abstract (en)
[origin: EP1387325A1] Provided are a remote counting system, a remote counting method, a remote counting program, and a medium for the same, with which it becomes possible to achieve labor saving in tabulating work and to expedite the tabulating work. A remote counting system includes a portable terminal (2) that is capable of being carried to a counting place and a remote counting server (3) that is connected to the portable terminal (2) through a communication line. In this system, the portable terminal (2) sends a button pushing operation signal inputted by the pushing of an input button to the remote counting server (3) through the communication line. The remote counting server (3) identifies communication from the portable terminal (2), detects the button pushing operation signal from each portable terminal, records the number of operations for pushing the buttons of the portable terminal (2) on the basis of the detected button pushing operation signal, and performs tabulation. <IMAGE>
