Abstract (en)
[origin: WO02079574A1] The invention relates to a device for displacing switch tongues (15) in relation to a stock rail (14). Said device comprises a slide chair having a slide chair plate (3) which is fixed to a sleeper. The inventive device also comprises a rolling device (1), the tongue tip lying on said rolling device with rolling friction during the displacement of the switch tongue. Said rolling device (1) is fixed to the stock rail (14), separately from the slide chair plate (3), and is only applied to the region above the sleeper (2) next to the slide chair plate (3).
