Abstract (en)
[origin: WO02093271A1] The invention concerns a timepiece (1) comprising a portion of its middle (30) detachable from the rest of the middle (10), said detachable portion bearing an interchangeable dial plate (20). The device is configured such that the dial plate never acts as a stop element when inserted in the timepiece. A closure device (3) enables to appropriately fix the interchangeable dial to the watch.
