Abstract (en)

[origin: EP1388613A2] The device is mounted on a truck (2) and has an auxiliary frame (4) secured to the truck chassis, at least one ram unit (5) mounted on the truck via a telescopic outrider (7), at least one post reception device and a feed device for transferring a post (1) to the ram unit. The latter and/or the outrider can pivot about the truck longitudinal axis, move horizontally in the direction of this axis and be adjusted in the vertical direction.
