Abstract (en)
[origin: EP1388657A2] Valve arrangement comprises at least one valve (10), a selector shaft (12) connected to the valve, an actuating device (20) connected to the selector shaft, and a rod-shaped offset compensation element (18) provided between the selector shaft and the actuating device. Preferred Features: The selector shaft or the actuating device has a holder (28) for connecting to the offset compensation element. The offset compensation element pivots relative to the holder. The holder and offset compensation element are inserted inside each other.
