Abstract (en)

[origin: EP1388755A1] A silver halide photographic processing solution comprising at least one polymeric compound inhibiting sludge formation and preventing "pi-line" artefact, more particularly in radiographic non-destructive testing applications, wherein said polymeric compound comprises at least one monomer unit having a silver complexing moiety and at least one monomer unit having a solubilising group, and wherein both said silver ion complexing moiety and said solubilising group are comprised in same or different monomer units.
