Abstract (en)

[origin: WO02076851A1] The invention concerns a water vapour generating device more particularly designed to be introduced in a package for heating or cooking food products with microwaves. It consists of a package in particular a bag made of a material at least partly porous to water vapour containing a gel capable of rapidly absorbing the microwaves, said gel containing one part by weight of hydrocolloid corresponding to its dry form, for at least 10 parts by weight of water.
