Abstract (en)
[origin: WO02089985A2] The invention relates to a container for receiving an analysis chip (40). Said container has openings (12a, 12b; 12c, 25) in the housing (10) which provide access to the analysis chip (40). The openings are protected against environmental influences by a displaceable protection (30). To carry out an analysis, the chip is introduced into a device comprising a mechanism for opening said protection (30).
