Abstract (en)

[origin: WO02092351A2] Techniques for dispensing postage from a kiosk using a communications network. A method for obtaining a postage stamp at a kiosk, where the kiosk includes a computer system and a printer, includes a user inputting a request for the postage stamp into the kiosk. The request is sent to a server via a communications network. The kiosk then receives a markup language response back from the server, and processes the markup language response to obtain an indicium. The printer prints the indicium on a label, where the label includes one or more security features, thereby providing the postage stamp.

[origin: WO02092351A2] Techniques for dispensing postage from a kiosk (104) using a communications network (108). A method for obtaining a postage stamp at a kiosk (104), where the kiosk (104) includes a computer system (300) and a printer (310), includes a user inputting a request for the postage stamp into the kiosk (104). The request is sent to a server (102) via a communications network (108). The kiosk then receives a markup language response back from the server (102), and processes the markup language response to obtain an indicium. The printer (31) prints the indicium on a label (400), where the label (400) includes one or more security features, thereby providing the postage stamp.
