Abstract (en)
[origin: WO02092445A1] A pallet (03) comprising a support plate (21) provided with supporting projections (26) which are arranged on the main side thereof which is configured as a supporting surface (19) for bearing a load, said projections being tapered towards a free end thereof, enabling supportive contact to be established with a second pallet (03) selectively at a small or imperceptible first distance or a large second vertical distance between said pallets (03). In order to receive the supporting projections (26), recesses (33) are formed on the second main side of the pallet (03) opposite the supporting surface (19).
