Abstract (en)

[origin: WO03001459A1] A technique for associating objects (10, 12) with regions (14) in scene space comprising the steps of (a) subdividing said scene space into regions according to predetermined mode of subdivision having associated therewith a unique binary naming convention; and (b) for each region (14) including said scene space, associating a list of objects (10, 12) that appear in that region or scene space with that region or scene space with that region or scene space based upon said unique binary naming convention.
