Abstract (en)

[origin: EP1391410A2] The roller rotation printing machine enables sheets to be printed in both newsprint and commercial quality with printing units of the roller rotation printing machine. The folding unit consists of at least one newspaper folding mechanism and at least one illustration folding mechanism and the relevant printed sheets can be fed to the newspaper folding mechanism and to the illustration folding mechanism according to the required folding quality. The roller rotation printing machine (1'') enables sheets to be printed in both newsprint and commercial quality with printing units (5'''-7''') of the roller rotation printing machine. The folding unit (2'') consists of at least one newspaper folding mechanism (3'') and at least one illustration folding mechanism (12') and the relevant printed sheets can be fed to the newspaper folding mechanism and to the illustration folding mechanism according to the required folding quality.
