Abstract (en)

[origin: EP1391682A1] The conveyer (3) with the fascines (6,6a) replaces the gun turret and gun of the normal tank (1) and can be tilted to allow one or more fascines to roll down onto the ground in front of the tank. There is a transport console (4) and a crane (5) at the rear of the tank. The tank runs on tracks (1a) as usual and has lifting arms (2) at the front carrying plows to disturb the mines and explode them.
