Abstract (en)
[origin: WO02091929A1] A tourniquet for a distal end (8) of a body extremity comprising an inflatable cuff (10) to fit around said distal end and means (12) for inflating the cuff with fluid, wherein the cuff is made from a tube having an open end for inflation and a closed end, the two ends being arranged to form a ring, and a slide (24) on the ring for adjusting the size of the ring to suit the distal end of the body extremity.
