Abstract (en)

[origin: WO02098345A1] The invention concerns a pharmaceutical composition for treating surface ocular disorders. The invention is characterised in that an antioxidant selected from the group consisting of superoxide dismutases, analogues and derivatives of said superoxide dismutases, racemic alpha-lipoic acid and its enantiomers R<+>, R<->, as well as mixtures of said compounds, is used for making a medicine designed for treating and/or preventing surface ocular disorders. The invention is applicable in human and veterinary medicine.
