Abstract (en)

[origin: WO02098523A1] Gaming arrangement comprising a device for generating a set of lottery tickets, said device comprising a first memory area in which a set of symbols is stored, a random symbol generator which randomly selects symbols from said first memory area and generates a set of matrices which are stored in a second memory area, and a called symbol field which is common to said set of lottery tickets and comprising a subset of said set of symbols, an application tool which is arranged to apply at least one bingo game field consisting of one of said matrices onto each lottery ticket, where a winning lottery ticket is arranged to be identified by means of a defined pattern being generated when symbols from said called symbol field are marked on said matrix, and also a game and a method for a lottery game supported by such a gaming arrangement.
