Abstract (en)  
[origin: WO02092918A1] The invention relates to a flood protection device comprising a supporting structure (10) for supporting a removable water impermeable protection sheet (1) to prevent water from passing by. The supporting structure (10) comprises a front for bearing against the protection sheet (11), a back, a horizontal stabilizing element (12, 40) for bearing against an underlying ground surface, and an elongated supporting element (13, 41) for bearing against the protection sheet (11), the supporting element (13, 41) being inclined in relation to the horizontal stabilizing element (12, 40).
