Abstract (en)

[origin: DE10127082A1] The multiple stage vacuum pump has at least one pair of pistons (2,3) defining multiple compression stages, each with a piston section (4-7), a cylinder section (16-19) and a working chamber (11-14) with inlet (41-44) and outlet (54-57) valves. The inlet opening of the inlet valve is formed as a radial slit in the wall of the respective cylinder section, with a height of ten to twenty percent of the piston stroke.
