Abstract (en)
The invention relates to a trolley (1) for transporting snow ski equipment, the trolley (1) comprising: a carriage (2) for carrying the equipment; snow ski mounting means for mounting at least one snow ski or snow board to the carriage (2) ski boot support means (4) for supporting at least one pair of ski boots on the carriage, and at least one wheel or skid attached to the carriage on which the carriage (2) may be pushed or pulled by a user of the trolley, wherein the ski mounting means comprise a ski-support at or near a lower end of the carriage (2) and a ski clamp at a predetermined distance above the ski-support to hold the at least one snow ski or snow board, whereby the ski clamp (8) is a bracket (8) having two sections (9,10) and an intermediate portion (11) connecting said two sections, whereby a first of said two sections is connected to the carriage at a far end from the point where said intermediate portion connects to said first section, and wherein the first section and the second section of the bracket are positioned above the said ski-support so as to allow that in use the first section and the second section are placed at opposite sides of the at least one snow ski or snow board, causing the ski or snow board to be held tightly between said first section and second section. <IMAGE>
