Abstract (en)
The invention relates to a wall panel (28,29,30,31) for a box pallet (21), which box pallet (21) comprises: a generally rectangular pallet (2) serving as support base, for instance comprising: a lath base (3), the laths (4) of which are mutually connected by cross-laths (5), and a number of supports (6) for placing the pallet (2) on a ground such that some space (7) remains clear under the lath base (3), such that the pallet (2) can be lifted by means of a fork-lift truck or other lifting means and four standing wall panels (28,29,30,31) which can be coupled releasably to the pallet (2) and to each other; which wall panel (28,29,30,31) comprises: a number of mutually parallel vertical laths (12) which are held at chosen mutual distances by two metal horizontal first profiles (33,34) which are coupled non-releasably to the respective ends of the laths (12). <??>The wall panel according to the invention has the feature that each first profile (33,34) has a prismatic, general U-shape, wherein the legs of the U extend over the side surfaces of the laths (12) and are coupled thereto. <IMAGE>
