Abstract (en)  
[origin: WO02096244A1] Container (2) suitable for the exposure of commodities, the container (2) being provided with a pick part (4) provided with a lid (6) for the access of the commodities as well as a refilling part (5) having a refilling container (5') arranged to enable refilling of the commodities exposed in the container (2), the container (2) being provided with a flow limiting member (8) for the commodities, which member is placed between the refilling part (5) and the pick part (4), which member forms a gap between the member (8) and the inner wall of the container (2) in order to limit the flow of commodities in the container (2) when commodities are removed from the pick part (4), the flow limiting member (8) being fixedly connected to an exposure front (7) in which commodities are contained for additional exposure.
