Abstract (en)  
[origin: WO02100232A1] A lever-operated dispenser (10) for dispensing a web of material (131) from a roll (130), the dispenser comprising a housing (20), a drive roller (90) acting on the web in use to dispense the web from the housing, means for rotating the drive roller in response to a force on the lever (40), a splicing device (70) which, at or near the depletion of a first roll (130) in use, causes a web (121) from a second roll (120) to be dispensed, and a cutting device (80) for cutting the web in use downstream of the drive roller, wherein the driving means, splicing device and cutting device are independently removable from the housing.
