Abstract (en)
[origin: WO02098620A2] A sawing machine, particularly a band sawing machine, comprising a blade (3) driven along a movement axis (A), a workpiece-carriage (11) on which an article to be cut (3) is located, and translation means (12, 13) for moving the carriage relative to the blade (3) along a plane substantially perpendicular to the movement axis. Pivoting means (16) are also associated with the workpiece-carriage (11) for pivoting the carriage about a pivot axis (B) which is stationary relative to the carriage and substantially parallel to the movement axis (A) of the blade.
